Abhinav Nepal

FULL STACK DEVELOPER

[Abhinav Nepal] | [abhinavnepal7@gmail.com] | [9768535232] | LinkedIn | GitHub | Portfolio

PROFILE

Full stack developer building clean, responsive websites from user interface to backends. Hands-on with Python and Flask for backend development, and HTML, CSS, JavaScript, and TypeScript for frontend experiences. I like to break and play with my own code that usually helps me in making stronger fundamentals for the program to rely on.

TECHNICAL SKILLS

Backend: Python, Flask, REST APIs
Frontend: HTML, CSS, JavaScript, TypeScript, ReactJS
Tools & workflow: Git, GitHub, Vercel, Alwaysdata, Pythonanywhere, Supabase
Core strengths: Full stack development, debugging, UI implementation, problem solving

EXPERIENCE

[Assistant Developer] | [DeployIT] | [04.26 – 10.26]
[Kathmandu]

• Contributed to developing and maintaining software features as part of the engineering team.
• Worked on routing, managing database tasks using MernStack.
• Investigated bugs and helped implement fixes to improve the application.

[Internship] | [Veltrix] | [07.25 – 02.26]
[Kathmandu]

• Contributed to backend features using Python and Flask, including server-side logic and REST API work.

• Tested API behavior, debugged backend issues, and used Git to track changes and collaborate with the team.

• Supported frontend tasks by updating responsive pages with HTML, CSS, and JavaScript.

PROJECTS

[CRUD Hardware enterprise] | [Flask, Python, HTML, CSS, TypeScript, MongoDB]
[A lightweight enterprise level website that allows the owner to manage their own site.] Code | Live demo

[Personal Portfolio] | [HTML, Tailwind CSS, ReactJS]
[Easy to read, and cool design with react. My portfolio site] Live demo | Code

EDUCATION

[A levels] | [Global College International] | [2023-2025]
